TECHNICAL SKILLS

Languages	**Javascript**, Ruby, Java, C++, C
Tools and Platforms	**React.js**, Node.js, Rails, Jest, TailwindCSS, Firebase, MongoDB, MySQL, PostgreSQL
Other	Git, GitHub, Figma

EXPERIENCE

Namu (Start-up)
Nov 2020 – Present

- Worked to launch an application for **church communities** to manage their members' personal information, dashboard, and weekly donations
- Independently designed and built **UI** for offering profile and donation history pages using **Ruby on Rails** .erb templating language and **PostgreSQL**
- Wrote **unit tests** using **Ruby** to test authorization of image upload permission and sending notification email
- Designed and built **minimum viable prototype** using **Figma** to demo to churches and implemented public website

PROJECTS

Lunar Birthday App
April 2022

https://lunarbirthday.netlify.app/

- Built a web app using **React** that helps users to convert their solar birthday in the past to the current lunar birthday
- Published a **Javascript npm** package to calculate lunar date in any target year with customized methods by enhancing an open-source library
- Integrated with Google Calendar to add the resulting lunar birthday on the user's Google account

Namu Public Site
April 2022 – Present

https://hellonamu.com/

- Built a **mobile-first** site using **React** based on responsive design with **TailwindCSS** to promote the product and explain pricing
- Prototyped entire layouts using **Figma** to develop and communicate with team based on Agile method
- Developed **localization features** to add language support for English and Korean

Business Card Maker App
July 2022 – Present

https://github.com/iamyujinwon/card-maker

- Built a web app using **React** to enable users to design business cards and manage them in personal account
- Enabled authentication using **Firebase** Authentication and integrated with Firebase Realtime Database to store user data
- Integrated with Cloudinary to store images uploaded by users and organized the card data based on each user

EDUCATION

Seneca College – Toronto, ON
May 2020 – April 2022

- Computer Programming – GPA 4.0/4.0
- Received President's Honour List on every school term
